

R&D Manager

CuRe Technology

Cure Technology is approaching a new phase in her development and is looking for an R&D Manager to coordinate all R&D activities to develop new technologies and processes

R&D Manager – Polyester Recycling

Are you a driven R&D professional with a passion for sustainability? Do you want to play a crucial role in developing groundbreaking recycling technologies?

Then we are looking for you!

As R&D Manager at CuRe Technology, you will lead our team of researchers in developing innovative processes for recycling polyester from packaging as well as from textiles.

Your role:

- Lead R&D projects focused on improving our recycling processes.
- Build strong relationships with knowledge institutions and industrial partners.
- Support and expand the IP portfolio.
- Develop and implement the R&D strategy.
- Report to the management team of CuRe Technology

Your profile:

- MSc in Chemistry, Chemical Engineering or a related field.
- Minimum 10 years of experience in R&D, preferably in the plastics industry.
- Experience in leading multidisciplinary teams.
- Strong communication and interpersonal skills.
- Passion for sustainability and innovation.
- Fluently Dutch and English in speaking and writing.
- Living in daily driving distance from Emmen, The Netherlands.

We offer:

- A challenging position in a dynamic and innovative environment.
- The opportunity to contribute to a more sustainable future.
- A professional and collegial team.
- Room for personal development.

Enthusiastic? Please send your CV and cover letter to: careers@curetechnology.com

About CuRe

We want to recycle any kind of polyester waste and make this the new normal. We CuRe any type of used polyester by removing the color and other additives and converting it into clear pellets with the same properties as fossil based polyester.

Join our polyester recycling revolution!
